

GLOW SKIN TRAINING

Specialize in treatments with whitening, brightening, anti-spot effects, oily skin, and acne. Includes a facial hygiene module and skin preparation.

METHODOLOGY:

- Combination of theory, live demonstrations, and practical sessions.
- Use of cutting-edge equipment and products.
- Continuous feedback and question-and-answer sessions.
- Access to a community of professionals for knowledge exchange.

WHAT WILL YOU LEARN?

- You will gain in-depth knowledge of various treatments that promote luminous and flawless skin.
- You will acquire skills in handling tools and products specific to each treatment.
- You will be trained to design customized and safe treatment protocols for each client.

COURSE CONTENT:

- This syllabus is a starting point and can be adapted according to the specific needs of the academy and current trends in the field of advanced aesthetics.
- The goal of the course is to provide comprehensive training that enables professionals to perform effective treatments that improve the quality and appearance of the skin, with a special emphasis on the most innovative and in-demand techniques in the industry.
- With a practical and results-focused approach, students will be able not only to enhance their technical knowledge but also to develop business and communication skills to successfully promote and apply Glow Skin treatments.

INTRODUCTION TO GLOW SKIN TREATMENTS

- Understanding the concept of luminous skin and its ideal characteristics.
- Evaluation and analysis of the skin for specific treatments.

SKIN SCIENCE AND FUNDAMENTALS OF FACIAL HYGIENE

- Anatomy and physiology of the skin related to luminosity.
- Techniques for deep cleansing and skin preparation.

WHITENING AND BRIGHTENING TREATMENTS

- Active ingredients and formulas for whitening treatments.
- Application techniques for brightening treatments.

FOCUS ON BLEMISHED SKIN: PROTOCOLS AND PRODUCTS

- Types of hyperpigmentation and correct diagnosis.
- Specialized treatments and products for blemishes.
- Practical demonstrations and management of complications.

MANAGEMENT OF OILY SKIN AND ACNE

- Causes and treatment of excess sebum and acne.
- Care routines and recommended products.
- Simulations and practical exercises on real cases.

ADVANCED TECHNIQUES FOR SKIN PREPARATION

- Peelings, microdermabrasion, and other preparatory techniques.
- Customization of treatment according to skin type.
- Supervised practical sessions.

INNOVATIONS IN THE CARE AND ENHANCEMENT OF LUMINOUS SKIN

- Latest research and technologies in facial aesthetics such as the Demela line, Ambar Pro, and Rejusome.
- Integration of advanced therapies into Glow Skin treatments.

CLINICAL PRACTICE: TREATMENTS AND OUTCOMES

- Observation and practice under supervision.
- Documentation of the treatment process and outcomes.
- Effective communication techniques with patients.

COMPETENCY ASSESSMENT AND CERTIFICATION

- Theoretical tests on knowledge and practical skills.
- Review of case studies and final presentations.
- Criteria for certificate attainment and course closure.
