

# FULL FACE LIFT TRAINING

Specialize in Facial Lifting, 'Aesthetic Botox,' Facial Redermalization, and Flaccidity. Includes a module on active ingredients, O2 Therapy, Carboxy Therapy, Exosomes, Fiber Threads, Lift UP, and the Lift Intense line.

## METHODOLOGY:

- Theoretical classes supported with multimedia materials.
- Live practical demonstrations.
- Supervised practice on models and/or patients.
- Group discussions and study of real cases.
- Continuous assessment through questionnaires and practical tests.

## WHAT WILL YOU LEARN?

- You will delve into advanced facial aesthetics techniques and learn how to combine them for customized treatments.
- You will develop skills to perform comprehensive facial assessments and propose treatment plans.
- You will learn how to manage patient expectations and conduct proper follow-ups.

## COURSE CONTENT:

Designed to provide comprehensive and practical education to aesthetic professionals who wish to specialize in non-surgical facial rejuvenation techniques.

The combination of theory, demonstrations, and practical sessions will ensure that students not only gain knowledge but also practical experience in applying these treatments
