

CHEMICAL PEELS TRAINING

The course covers the history and types of peels, skin preparation, advancements in chemical and Korean peels, safe application of marine ingredients, post-peeling care, Jet Peel®, combinations with other aesthetic techniques, marketing, and practical assessment for certification.

METHODOLOGY:

- Theoretical classes supported by updated multimedia and scientific materials.
- Live demonstrations and intensive practical sessions.
- Regular evaluations and monitoring of learning progress.
- Access to a discussion forum and additional online resources.

WHAT WILL YOU LEARN?

- You will master the most advanced and current techniques in chemical peels.
- You will be capable of conducting a detailed skin evaluation to select the most suitable peel.
- You will acquire skills to combine peeling with other aesthetic techniques and optimize results.

COURSE CONTENT:

This syllabus is focused on providing advanced and specialized education in the field of chemical peels, ensuring that students not only acquire knowledge and practical skills but are also prepared to implement and promote these services in their professional practice.

1 INTRODUCTION TO CHEMICAL PEELS

- History and evolution of chemical peels.
- Types of peels and their indications.
- Safety and contraindications.

2 FUNDAMENTALS OF SKIN AND PREPARATION FOR PEELS

- Anatomy and physiology of the skin.
- Skin evaluation and selection of appropriate peels.
- Skin preparation before peeling.

3 CUTTING-EDGE CHEMICAL PEELS

- Recent advancements in chemical peels.
- Multi-acid peels and their benefits.
- Practice with the latest formulas on the market.

4 KOREAN PEELS: TECHNIQUES AND PRODUCTS

- Specialization in Korean peels and their philosophy.
- Specific protocols and application techniques.
- Practical sessions with Korean peels.

5 SPICULE PEELING AND SEAWEED AND CORAL PEELS

- Characteristics and benefits of spicule peels.
- Use of marine ingredients such as seaweed and coral.
- Application and safe removal techniques.

6 POST-PEELING MANAGEMENT AND CARE

- Post-peeling care protocols.
- Management of adverse reactions.
- Promoting skin regeneration and recovery.

7 FREE BONUS: JET PEEL® TRAINING

- Principles and operation of the Jet Peel®.
- Application techniques and combination with peels.
- Supervised practices with Jet Peel® equipment.

8 COMBINING PEELS WITH OTHER AESTHETIC TECHNIQUES

- Integration of peels with complementary treatments.
- Customization of combined treatments.
- Clinical cases and examples of successful combinations.

9 COMMERCIAL ASPECTS AND MARKETING IN PEELS

- Creation of treatment packages and promotions.
- Marketing strategies for peeling services.
- Customer retention and building a patient base.

10 PRACTICAL EVALUATION AND CERTIFICATION

- Tests of theoretical knowledge and technical skills.
- Evaluation of practical cases and outcomes.
- Certificate issuance and course closure.

WHY CHOOSE US?

YOU WILL RECEIVE:

- Professional starter kit,
- Official certification,
- Post-training support and advice,
- Marketing materials,
- Protocols,
- Technical data sheets,
- Consent forms,
- Special discounts on products and much more.

BEFORE & AFTER:
